

Installation and Activation

- Insert the DVD into your DVD drive and follow the instructions of the wizard. If the wizard does not start automatically, double-click the DVD icon on your file explorer.
- To activate the license, you have to enter the License and its details as shown on the license, the software keys and the activation certificate.
- After installation, start the GeoOffice software. The wizard will be shown on the screen. The wizard will guide you through the activation process. You must have Administrative Privileges on your computer to activate the GeoOffice.
